-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claims 1 and 3 - 12 have been examined. Claim 2 has been canceled by Applicant.

Drawings

The drawings are objected to because:

- the hand drawn figures, especially figure 1, are poorly drawn and the details of the components are difficult to discern;
- the hand written reference and figure numbers are non-uniform and difficult to discern.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 3 - 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the riding position". There is insufficient antecedent basis for this limitation in the claim.

Claim 4 recites the limitation "the device to fix the pivot axis". There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1 and 3 - 9 are rejected under 35 U.S.C. 102(a) as being anticipated by Draper et al. (7,159,892). Draper discloses a snowboard binding comprising:

- a base plate (Fig. 1, item 28);

- a pivoting heel strap (Fig. 1, item 34);
- a highback shell (Fig. 1, item 20);
- a device to fix a pivot angle of said heel strap (Fig. 3, item 120);
- said device to fix a pivot angle of said heel strap is positioned at a distance from a pivot axis of said heel strap (Figs. 3 and 4);
- a pivoting joint between said highback shell and said heel strap (Fig. 2, item 102);
- said base plate including sidewalls to which said heel strap is pivotally attached (Fig. 1, items 30 and 32);
- a damping pad between said heel strap and said base plate (Fig. 2, item 160);
- said device to fix the pivot angle of said heel strap presses said heel strap against said base plate (Fig. 1);
- an attachment between said base plate and said heel strap being a form closure including a toothing arrangement (Fig. 2, item 106);
- a screw provided to press said heel strap against said base plate (Fig. 2, item 106).

Allowable Subject Matter

Claims 10 - 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Okajima (6,155,577) discloses a highback lever mechanism;
- Hirayama et al. (6,467,795) disclose a snowboard binding with highback;
- Marmonier et al. (6,581,944) disclose a snowboard binding;
- Okajima (6,742,800) discloses a snowboard binding system.
